## MOREMANUS FRAILFROAD COFYRIGHT 1991

The self booting WELCOME screen takes you to an animated 4 car train ride via multiple screens to the MCRR depot where you can take control of the locomotive with your joystick and move it around the screen. HOP ABOARD HOW!!

HOTE: To make full use of this media you must already have PowerPAINT (PP). With FP you can now design & print your Model RailRoad Layout Track (Choice of 4 different track widths), complete with switches and crossovers. Very practical if you are modeling in more than one scale.

The Sprite sets (32 in each set) also include the Alphabet & Arithmetic symbols sitting on flatcars for you to print out exercises for children to fill out the answers. Both a Smiley and Sad face are included.

Your stationary letter heads can now have a R.R. theme. By using Tractor Feed Card Stock, available from LYBEN, you can produce POSTCARDS, BULLETIN BOARD notices and ADS.

Select from the 2 RETURN ADDRESS LABELS included. Sprite sets include normal and large RR Locos, Freight and Passenger cars Make up and print out your train sets.

Two different RailRoad SPRITE DEMO PD programs included Many REMark statements should help you to make changes & thus understand SmartBASIC while having fun on NORMANS RR.

Model RR inventory and work sheets that you can print out via SmartWRITER are included. These were designed for my American Flyer, Marx, and Ives in Standard, O, S, and 027 gauge.

Over 125K of useful RailRoad theme utilities for only \$10 plus \$2 5/H on 160 disk or on DD Pack for \$12 + \$2 5/H.
