8mbCPM is for use with the ADE
(Adam Disk Emulator), the VDD
(Virtual Disk Drive) or with
an emulator.

8mbCPM is a modified version
of the Coleco Adam CP/M 2.2
that allows you to have the
following setup:

A: 8mb with up to 512
            directory entries
B: 160kb standard disk
            drive
C & D: Standard 256kb data
            drives
M: Standard 64kb RAM
            disk if you have the
            expanded ram
