CROSS CHASE - THE GAME

The game's goal is to lure the "ghosts" into the mines and possibly kill the "skull" by repeatedly using the gun. You have to avoid all enemies, the mines, all walls, rockets and chasing missiles. All flashing items have positive effects and can grant you some special powers. Discover the 10 items. If you use the gun against the skull and/or the missiles and rockets, you can unlock some special secret items. There are 20 different levels including 4 boss levels.

CONTROLS: either the joystick or I J K L (to move) and SPACE to fire.

You can play the game online for different systems:

1. Atari LYNX:
   https://atarigamer.com/lynx/play/CrossChase/675300242

2. Commodore 264 series (C16/C116/C+4):
