

# CV cartScanner

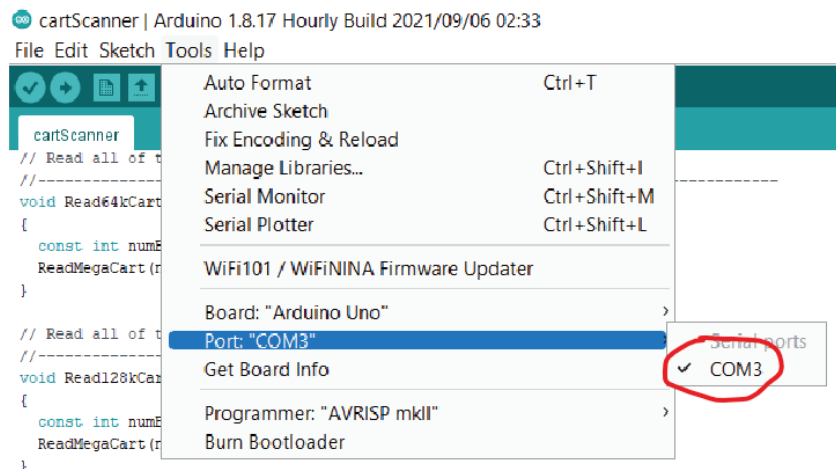

## How to update the cartScanner sketch file

### 1. Install the Arduino IDE:

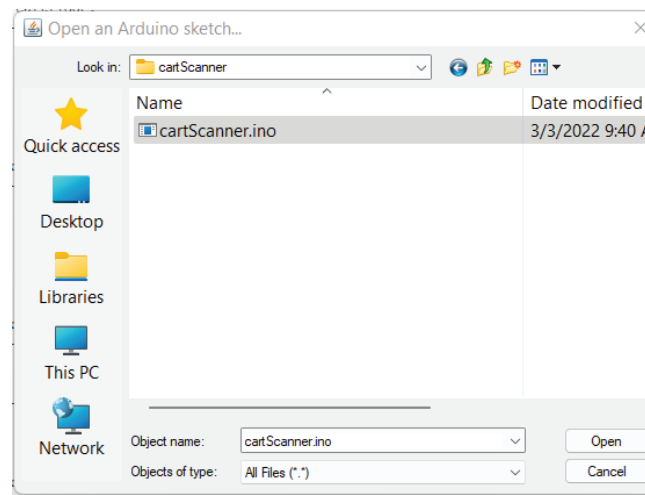

Install the following software: <https://downloads.arduino.cc/arduino-1.8.19-windows.exe>

### 2. Run the IDE, then click on Tools -> Ports and select the correct COM port.

If you aren't sure which com port you are using, launch the cartScanner software and click settings.

### 3. Click File -> Open and navigate to the ArduinoSketch/cartScanner directory and Open cartScanner.ino.

### 4. Click the right arrow button at the top of the screen to transfer the code to the cartScanner. Done!
